

MIR-C318L NONPAD PRESSING

◆ Features :

- No need to press the sole module button, reducing production costs.
- Dual-purpose machine for shoe molding and bottom assembly.
- Simple operation: just place the shoes. The machine has a straightforward design and is easy to maintain.
- Provides 360° uniform pressure, ensuring stability and accuracy while reducing degumming on sidewalls and corners.
- Equipped with an infrared sensor, explosion-proof safety door, and emergency stop for safe and reliable operation.
- The hydraulic cylinder bladder fits into a 395 x 160 x 230mm space (L x W x H).
- Supports various shoe shapes, including small children's shoes, processed one pair at a time.
- Long-lasting bladder, handling over 110,000 cycles for standard sports shoes.
- Uses a full servo screw system to control the hydraulic piston, delivering fast and accurate 360° pressure for flame-resistant, water-based adhesives.
- High-precision servo system is faster, more accurate, oil-free, and quieter (below 80dB), with energy-saving and eco-friendly performance.
- Modern integrated circuit and oil circuit design reduce maintenance rates and lower daily upkeep costs.
- Fuel-free design requires no refueling; the machine is ready to use upon arrival.
- Power consumption: Primary pressure 10KG, holding pressure 2S; secondary pressure 33KG, holding pressure 6S. Processes 240 pairs per hour with an average power consumption of 0.0042 kWh per pair.

◆ Technical Parameter :

Machine size	1285mm x 1125mm x 2000mm
Net weight	1910kg
Operating voltage/power	AC380V 3.8KW/7.5A
Actual power consumption	1 hour \leq 1 degree 1H \leq 1 degree
Hydraulic oil	Water-based hydraulic oil
