

RTHC-329A 自轉充氣式劃線機

— We Work For The Future —

Automatic Rotating Air Charging Type Marking Machine

FEATURE:

- The machine is powered by pneumatic technology, featuring a swiveling inflatable airbag pan. It is compact, labor-saving, and equipped with foot-pedal switches for easy control, allowing hands-free operation for smoother and more efficient work.
- The inflatable airbag pan volume can be freely adjusted using specialized pneumatic circuit components. This enables the airbag to conform closely to the shoe lasts or soles without requiring additional pads, ensuring the sole's profile line is revealed perfectly.
- This machine is suitable for various types of shoes.
- The pressing shoe for the front toe and quarter is equipped with a non-rotating cylinder. The pressing shoes can rotate synchronously with the inflatable bag pan.
- The air inflation and release processes are electronically controlled and adjustable as needed. A built-in tool rack provides convenient storage for hand tools.
- The machine is compact, neat, simple to operate, noiseless, and has a low fault rate.

任何鞋型 不需墊子
一次完成
Anyhow Shoe Style
& No Need Pad
